

Subject: Request to Initiate 'Omnichannel Retail Behaviour and Performance Analytics Dashboard Project – OmniMart Pvt Ltd'

To: Sudhagar (Business Intelligence Engineer)

From: Deepa Menon (Sales Director)

Date:

Hi,

We at **OmniMart Pvt Ltd** are looking to develop a unified performance dashboard to analyse our sales trends, campaign efficiency, customer behaviour, and support team responsiveness across both online and offline channels. The current reporting setup is fragmented, static and lacks interactivity. We want a solution that empowers our leadership and regional managers with actionable insights.

Key goals for this project:

- Track revenue evolution across months and categories (CY vs PY comparison)
- Analyse churn by customer age group and geography
- Visualize campaign ROI, CTR, and conversion patterns
- Monitor SLA performance and resolution times for support tickets
- Enable slicers by time period, category, state, and product type
- Provide drillthroughs to transaction-level details and ticket-level breakdowns

We'll provide sample datasets (SQL), budget benchmarks (Excel) and feedback from internal users to support your documentation and design.

Please begin by drafting a **Business Requirements Document (BRD)** that outlines:

- Project scope
- Key KPIs and metrics
- Stakeholder expectations
- Proposed dashboard layout

Let's set up a requirements workshop early next week to discuss these in more detail. I'll coordinate with the Sales, Marketing and Support leads to join the session.

Let me know what prep you need, and feel free to reach out if any clarification is required.

Best regards,
Deepa Menon
Sales Director,
OmniMart Pvt Ltd
